Shipments within 3 business days

Snatch Blocks

Gunnebo Johnson Snatch Blocks have the convenient side opening feature making it easy to reeve the block without removing any fitting from the end of the wire rope. Other features include choice of swivel hook, shackle, eye fittings or Tailboard Blocks which have no fittings at all.

Guyline Blocks

Gunnebo Johnson has been producing oilfield equipment for over five decades. We know the needs and we have the know-how to fulfill them with quality lifting devices. The Guyline block is available in both single and double sheave and has a 3:1 safety factor

Swivels

Standard designs are available in a wide variety of styles. Engineered for long life at a reasonable cost. Features include roller thrust bearings, recessed grease fittings and hooks of drop forged steel. All swivels have a 4:1 design factor. High capacity, custom engineered swivels available upon request. Heavy duty J-latch standard on hook models.

Overhaul Balls

Provide the overhaul weight necessary to counter bearing friction and winch-to-boom-tip line weight. We offer models from 3 - 30 tons WLL. Non-swivel balls are also available.

Wedge Sockets

Open Wedge Sockets combine positive attachment with optimum versatility. Easy-to-change Gunnebo Johnson Wedge Sockets are a high strength cast alloy steel with Charpy value of 25 lbs/ft at -4 °F Each socket accepts at least two different ductile iron wedges. This allows the socket to be used with more than one rope size. Together, wedge and body, act as a vise which grips the wire rope and locks it into place. The headed attachment pin is standard and has a Charpy value of 25 lbs/ft at -4 °F.
